ELIO Buzzers Quick Start Guide

Order Matters. Each buzzer must be plugged in in the proper place to function correctly. Each buzzer has a "map" showing where it belongs in relation to the center control box.

Use the map on each piece to line up all the buzzers beside the center box. The big square represents the center box, and the solid white box shows where the individual buzzer belongs.

Plug the 2-ft cords between each box in the row and use the longer cord for the remote clear button. Connect the power cord and play a game!

WARNING:

Avoid extreme heat (e.g. leaving in hot car) → may warp PLA plastic
